

The Daily Gazetteer.

FRIDAY, JULY 26, 1745.

Madrid, July 5.

HE Court is at last determined, at the Motion of the French Ambassador, lately promoted to the Rank of a Grandee, to undertake a secret Expedition; which, from the Preparations made for it, must needs be of very great Importance. There is to be an Embarkation of 6000 old Troops, drawn out

of the Provinces of Valencia, Murcia, and Extremadura. The Officers who are to command them are all Men of Experience, and of some of the best Families in the Kingdom; they have Orders to repair to Cadiz by the Close of the current Month. It is rumour'd, that this Expedition regards a very distant Part of the World; the Court seems to say, America; but we cannot tell how to believe it, because the Four Men of War that are at Cartagena, and are to escort this Embarkation, have taken on board a vast Quantity of Fire-Arms, and Ammunition and Provisions only for two Months. We dispatch'd last Week, under the Escort of a fine Regiment of Horse, a Million and half of new Pieces of Eight for the Army in Italy; and we are getting ready the like Sum, which will be infallibly sent to Genoa, before the Close of the Month. The Court seems to be extremely pleased with the present Situation of Things; and nobody has any Occasion to be out of Humour, except the Minister from Bavaria, who has been suffer'd to go away without an Audience, and without the usual Present; which is a Thing that scarce ever happen'd to any Foreign Minister during the present Reign.

Rome, July 10. The Pope has appointed a Congregation to examine a Treatise upon Usury, and the Interest that may be lawfully taken for the Use of Money. It was written by the Abbe Maffei, a Person of great Character, who is said to have handled this delicate Subject in a very excellent Manner; but inasmuch as it is a Subject which interests both the Church and the State, his Holiness is resolved to let nothing appear about it which may beget any Inconveniences, by establishing either too rigid or too loose Principles in Reference to that Point. Many People here expect the Books will be condemn'd.

Milan, July 13. The Army of the Count de Gages begins to extend itself towards the Tortonese and Alexandria; whereas that of the Infant Don Philip moves slowly thro' the Valley of Bormida, towards Cairo and Mefino, in order to join the former. The Austrians and Piedmontese are actually encamped between Tortona and Alexandria; the Head Quarters being in the last mentioned City, where the King of Sardinia is in Person. Yesterday that Army made a Motion, in order to form a Cord as far as Voghera, that they may secure Subsistence, and the great Road that runs along the Po. We are pretty certain that the Enemy intend to begin their Operations with the Siege of Alexandria; which is extremely well provided, and may, possibly, prove another Coni to them. We have no Idea that the French will be able to do much on the Side of Demont, or even on that of Nice or Oniglio; since, notwithstanding the Battalions and Squadrons they muster upon Paper, we are very well satisfied their Forces are but weak; their greatest Efforts therefore will be on the Side of Monferat and Alexandria; and if we can but defeat these, Things, in other Parts of the Country, will go well enough of themselves.

Berlin, July 15. It is very certain that a Negotiation has been for some time on Foot, for compromising the Disputes between the Queen of Hungary and the King our Sovereign. His Majesty is certainly inclined to Peace, and not at all well pleas'd with the Conduct of the French this Campaign; who have push'd their own Affairs vigorously on the Side of Flanders, without making any considerable Diversion on the Side of Germany; contrary to the repeated Assurances they gave the King upon that Head. But if a Peace be made, it will be under the Mediation and Guaranty of the Czarina, the King of Poland, and the Maritime Powers, that his Majesty may be certain of keeping Silesia; and, in that Case, it is thought he will pay the French in their own Coin, and make no Scruple of giving his Voice for the Grand Duke.

Manheim, July 23. On the 19th of this Month 600 French, who were at Ladenbourg, began their March from thence, in order to retire towards Spire, leaving only 140 Men at the first mentioned Place, to guard their Magazine; who have Orders to send away as much of

it as they can in Time, and to burn the rest. General Trips is since advanc'd towards that Place, and will very probably put it out of the Power of the French to execute their Orders. The Army of the Grand Duke is actually encamp'd over against Worms, and it is believ'd he will speedily transfer his Head Quarters to Heidelberg, which gives us a great deal of Unrest. A few Days ago Lieutenant-Colonel Fustemberg set out to compliment his Royal Highness in the Name of our Elector, and Yesterday the Court received a Courier from him; upon which, a great Council of State was held; since which, our Ministers seem to be in no small Confusion. It is strongly reported, that his Royal Highness intends to reside at Heidelberg till the Election is over; and, consequently, all his Forces will live during that Time at Discretion in our Territories, unless his Serene Highness, our Elector, prevents it by a speedy Compromise of his Disputes with the Queen of Hungary.

Worms, July 24. The French, on the 20th of this Month, marched with their Army thro' the Neighbourhood of this City to Heppenheim, and did a vast deal of Mischief in their Way, the Corn being all standing. We apprehend that they are moving with all imaginable Diligence towards Landau; and, in the mean time, the Army of the Grand Duke of Tuscany is advancing directly towards Phillipsburg. The Croats and Pandours have harassed the French exceedingly in their Retreat, and have taken a vast Quantity of their Baggage; but, during this, the Army has escaped pretty well. Yesterday the Prince of Conti dispatched an Express to the King, his Master, to acquaint him with the Reasons of his Retreat, the Condition he is now in, and the absolute Necessity there is of sending him a Reinforcement of at least 30 Squadrons, and 20 Battalions.

Brussels, July 26. We do not talk very freely here as to the Operations of the War; but, however, it is whisper'd that the Affair of General Molck has given Occasion to some Misunderstandings amongst his Superiors. In the Council of War that was held a little before he marched, the Austrian and English Generals were absolutely for posting the whole Army behind the Canal of that Place, in order to preserve the Communication with Ostend; but Prince Waldeck absolutely insist'd on their preserving rather their Communication with Holland, alledging, that if a strong Detachment was thrown into Ghent, it would fully answer what was proposed from such a Motion of the Army. The Accident that befel General Molck, who was detach'd agreeable to his Advice, occasioned some severe Remarks upon it; in answer to which, the Dutch Officers say, that General Molck had a sufficient Force to have secured Ghent, and Time enough to have got thither, if he had not amus'd himself, and gone out of the Way, to attack the Grassins, and by that Means drawn upon him the French Forces, which were actually encamp'd, and had not any Thoughts of attacking, or surprizing him. It is very natural, on Accidents of this Nature, for the wisest Men to differ in their Sentiments; but, in the mean time, it is most certain, that amongst these Differences we have lost Ghent and Bruges, and our Communication with England; which possible might have been prevented, if the Sentiments of his Royal Highness had been followed.

SCHWANBERG'S LIQUID-SHELL, To be DEFENDED UPON in the GRAVEL and STONE.

THE Rev. Dr. Hales, and others, have demonstrated by various Experiments, That the Virtues of Mrs. Stevens's Medicine for the GRAVEL and STONE, depend upon the SALTS of Lime in the Allicant Soap, and calcin'd Shells; but its enormous Dose renders it dangerous, that it is almost impossible to take it in a manner sufficient to answer any good End. This, then, will inform such unhappy Persons who are afflicted with the GRAVEL and STONE, that M. SCHWANBERG, a learned and ingenious Gentleman, well versed in the most abstruse Operations of Chymistry, has invented a Method of Liquifying calcin'd Shells, so as to become impudic Rock-water, yet not corrosive. They give almost immediate Relief in the most violent Pains of the GRAVEL; and, if duly perfused in, will, in time, bid fair for dissolving a Gras in the Urinary Passages, when too large to pass off otherwise. They may be depended on in the Wind-Colic, and all Kind of Fluxes; and, where an Alcali is wanting, will answer the desired End. A Child may take them in the Month, for Griping, Fevers, and Uneasinesses, which Children are subject to, from Acidities, the known Cause of most of their Distresses.

It is remarkable, That those who take them for the STONE, have a Sediment in their Urine resembling powdered Chalk: Now, that this Sediment is a Portion of the Stone dissolved, is evident from an Experiment in the Year of every one to make; for, put an human STONE, found in the Urinary Passages, into a Vial of the LIQUID-SHELL, and it will gradually dissolve into a White Powder, exactly resembling that in the Urine of Persons who take it as a Medicine for the STONE, and this in an Heat not greater than that of the Body, &c. at the same time, not in the least affect an human Hair put therein; and, which surprisingly will, upon the Assumption of an Acid, be instantly converted into a Snow-white Powder.

To be had of the Proprietor W. Baker, at his House in Helm-court, near Katherine-street in the Strand; and, by his Appointment, of R. Lee, Stationer, under the Starbury, facing Sejeants-Inn in Fleet-street; and of John Newbery, of the Golden Ball in Castle Alley, near the Royal Exchange, London; or, at his Printing-Office in Reading, at 1s. 6d. the small Vial.

The Dose is from 10 Drops to 30; and not unpleasant.

TINCTURA MIRIFICA: O. R.

The Admirable TINCTURE, which infallibly cures the STONE and GRAVEL, whether in the KIDNEYS, URETERS, or BLADDER, and also the Strangury, Stoppage of Urine, and all Heat, Pain and Difficulty in Making Water.

A Few Drops of it momentarilly take off the most excruciating Pains in the REINS or BLADDER, and certainly prevent their Return; for it infallibly cures that Disease in an extraordinary Manner instantly removes all Uneasiness or Difficulty in making Water, heals all Excoriations, and even Ulcers of the Urinary Passages, relaxes the Ureters, so that small Stones, together with Gravel, and all mucous slimy obstructing Matter may pass freely from the Kidneys, to be voided visibly with Urine, without Pain; effectually cleanses the Reins, Ureters, and Bladder from all Impurities, entirely prevents the Stone in those who are troubled with the Gravel only; assur'dly dissolves all large Stones, possible to be dissolved; and likewise brings all the Urinary Parts and Passages to their due Tone and Vigour, so as perfectly to free the Patient from all the terrible Symptoms and miserable Effects of that torturing Disease.

It is the safest Medicine in the World, and not disagreeable to take; the very first Dose of it absolutely cures the most dreadful Fit of either Stone or Gravel, in a Minute, giving such wonderful Relief and perfect Ease, as is indeed very surprizing; and this great Numbers of Persons of Worth have experienced, to their infinite Satisfaction.

It is to be had only at Mr. Radford's Tayshop, at the Rose and Crown against St. Clement's Church-Yard in the Strand at 3s. 6d. a Bottle, with Directions.
